WORK EXPERIENCE

Freelance Software Engineer

Quality PC and Repair

March 2021 – March 2021 (A few weeks)

- Improved order tracking of customer contract renewals by designing and implementing a corporate financial management system
- Incorporated relevant technologies to achieve maximal results and company goals such as: Object Oriented PHP for standard CRUD operations, the MVC architecture for file structure, the XAMPP package which gives access to the apache HTTP webserver and the MySQL RDBMS.

OTHER EXPERIENCE

Course Work

Jackson College

December 2017 – Present

- Implemented several console applications in C++ and Java giving me experience with OOP concepts such as Abstraction, Encapsulation, Inheritance, and Polymorphism.
- Familiarized with the SDLC and different methodologies such as the waterfall and agile methodologies.

Personal Projects

Personal Website

April 2021 – June 2021

- This is a portfolio that contains projects that I've worked on such as a financial management system, various college programs, and more!
